Jingcheng Hao received his Ph.D. from Lanzhou Institute of Chemical Physics, Chinese Academy of Sciences (CAS), Lanzhou, P. R. China, in 1995. Subsequently, Dr. Hao had a series of postdoctoral research positions at Lanzhou Institute, Nagoya University (Japan) as a Daiko Foundation Fellow, Bayreuth University (Germany) as an Alexander von Humboldt Foundation Fellow, and finally at SUNY-Stony Brook (USA) as a Research Specialist. In December 2002, he joined Shandong University, Jinan, P. R. China, where he is currently Professor and Director of the Key Laboratory of Colloid and Interface Chemistry, Ministry of Education, and also director of School of Chemistry and Chemical Engineering, Shandong University. His research focuses on colloid and interfacial sciences, including surfactants in solution and self-assembly at all scales in bulk solutions and at surfaces. He obtained the National Outstanding Youth Funds (2006), Changjiang Scholars (2007), Lectureship Award of Japan Research Institute of Material Technology (2008), A Contribution Award to the Advancement of Asian Society of Colloid and Interface Sciences (2009), Chinese Chemical Society (CCS)-BASF Innovation Prize (2009), the first prize of Ministry of Education in Science (2102), Asian Rising Stars (2013), AkzoNobel China Award (2014), and other scientific awards. Dr. Hao has published over 300 articles including original papers, reviews, books and book chapters.
